

Book(re)binding

...

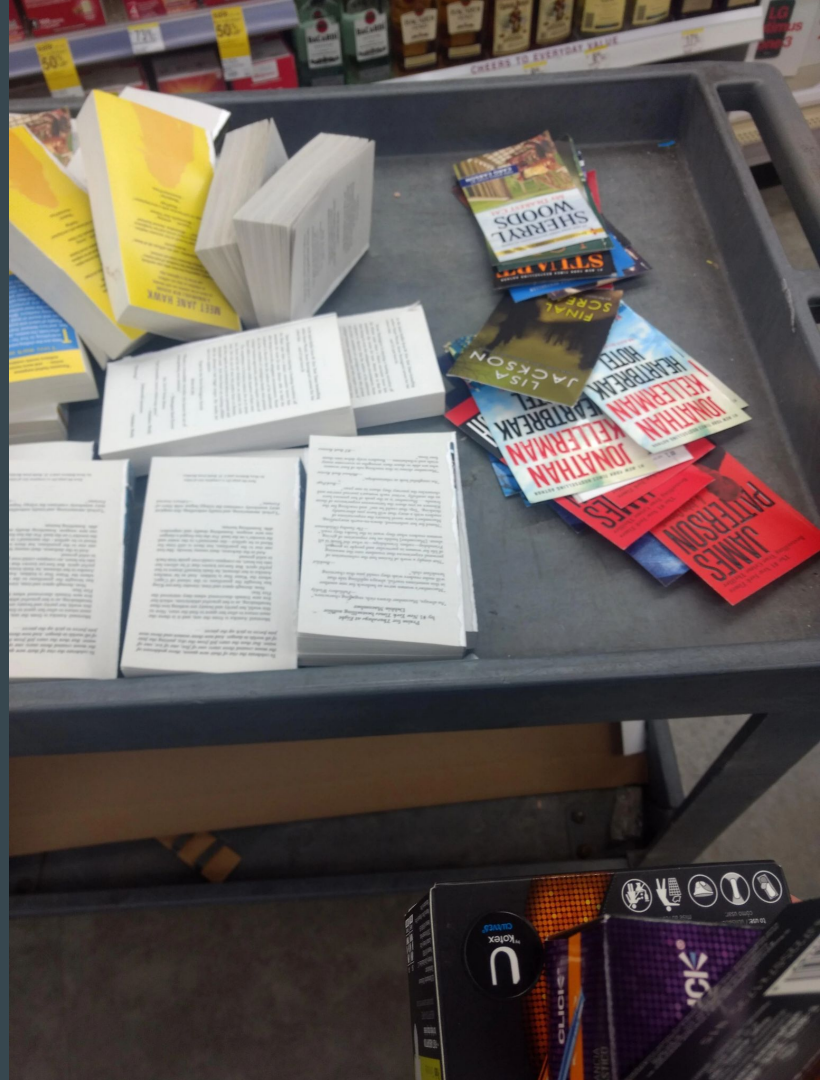

1/24/2024

SPLIT INTO TWO GROUPS

1. Group 1: Start working on book cover design
2. Group 2: Start book binding

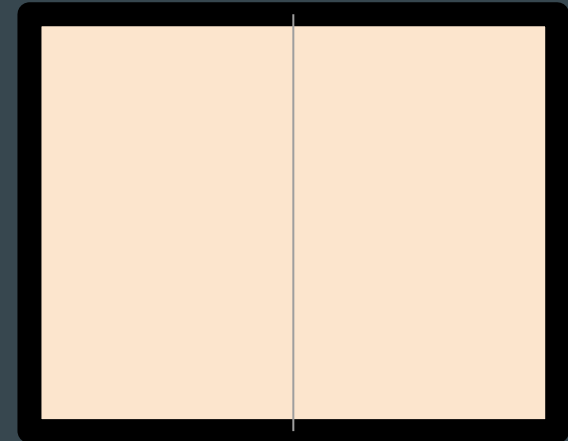

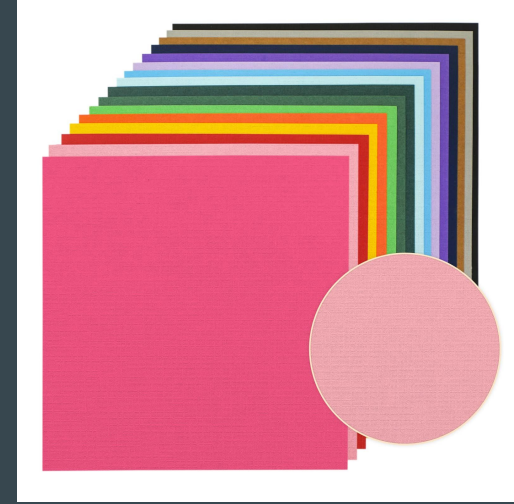

PART 1: Prepping Textblock

1. Rip off the cover!
2. Sand down the spine!
3. Make an arrow that points which way is up and down of the book

Part 1: Making the Endpapers

1. Pick two pieces of Cardstock
2. Measure width and height of book (**MEASURE TWICE CUT ONCE**)
3. On the cardstock find the long grain side
 - a. The paper will fold easier with the grain than against the grain
4. On the long grain create a (wx2) vs. height marks (**COME SEE VALERIE**)
5. Cut out the paper (x2) Need one endpaper for each side of the book
 - a. ONLY CUT WITH AN X-acto knife and cork-backed ruler
6. Fold with the bone folder (make sure pretty side is facing up)

Part 1: Gluing the Endpaper

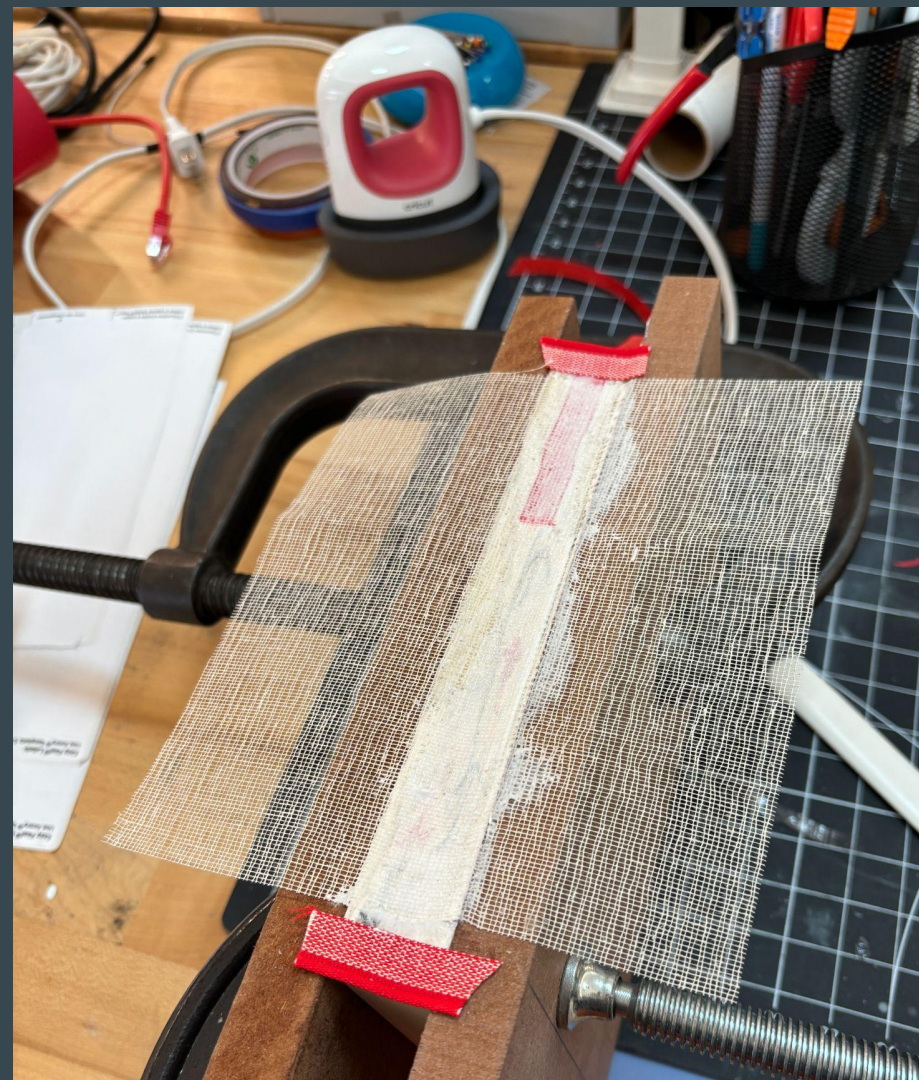

1. Cover the endpaper with scrap paper
2. Leave about 3-5 mm of area
3. Grab a small brush!!
4. Brush glue on entire 3-5mm surface
5. Attach to the textblock

Glue Here

Part 1: Add the book cloth

1. Cut out your book cloth with 1 inch both side
2. Put your book between the two blocks with two clamps
3. Choose bookmark ribbon and glue it to the spine **(MAKE SURE YOU KNOW WHICH WAY IS UP)**
4. Now take cut out book cloth and glue it to the textblock
5. Take headband and cut out two pieces bit longer than the width of your spine
6. Glue to both sides of spine

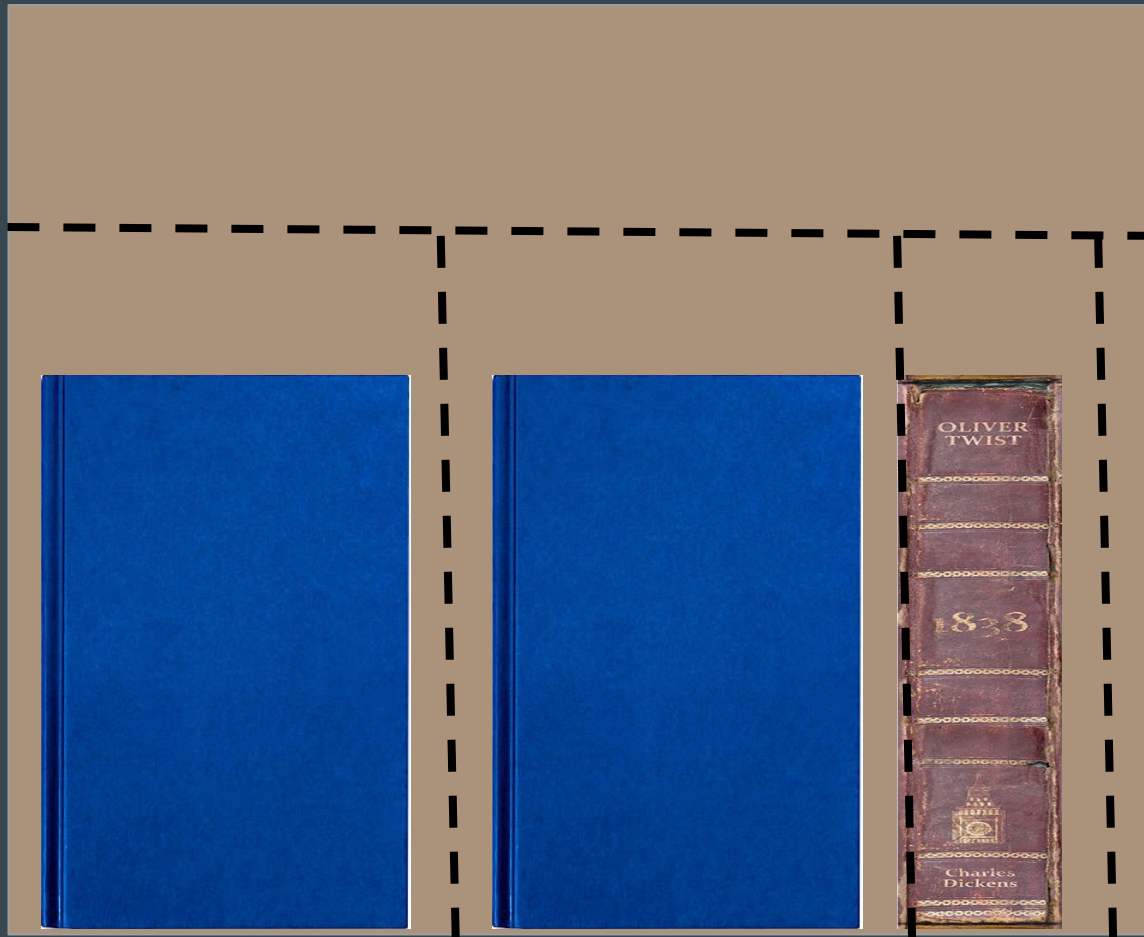

SWITCH GROUPS!

Part 2: Creating the Case

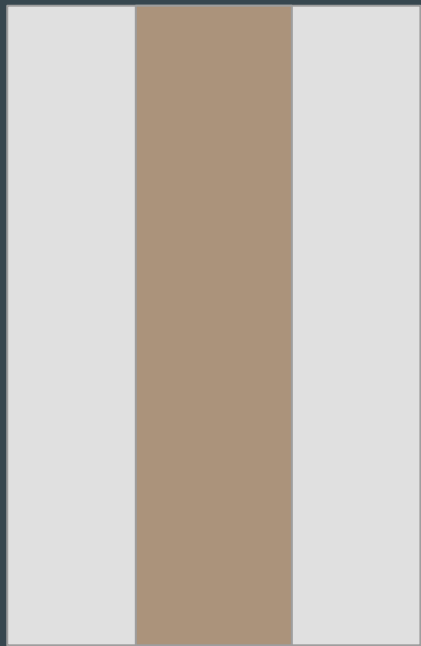

1. Take a piece of book board
2. Make spine
 - a. Measure thickness of book board plus spine
 - b. Measure out combined width x height of book + 4 cm tolerance
3. Make front and back of the cover
 - a. Cut out two equal pieces of chipboard
 - b. Make sure it's bigger than book
4. Glue to cardstock
 - a. Grab white cardstock on paper
 - b. Trace spine on piece of cardstock
 - c. Put glue on entire area of traced out paper
 - d. Glue spine to the cardstock
 - e. Use your bone folder to flatten out and make creases (ASK VALERIE)
 - f. Glue the rest of the of the boards to the paper (measure 3-4 mm from the edge of the glued spine)

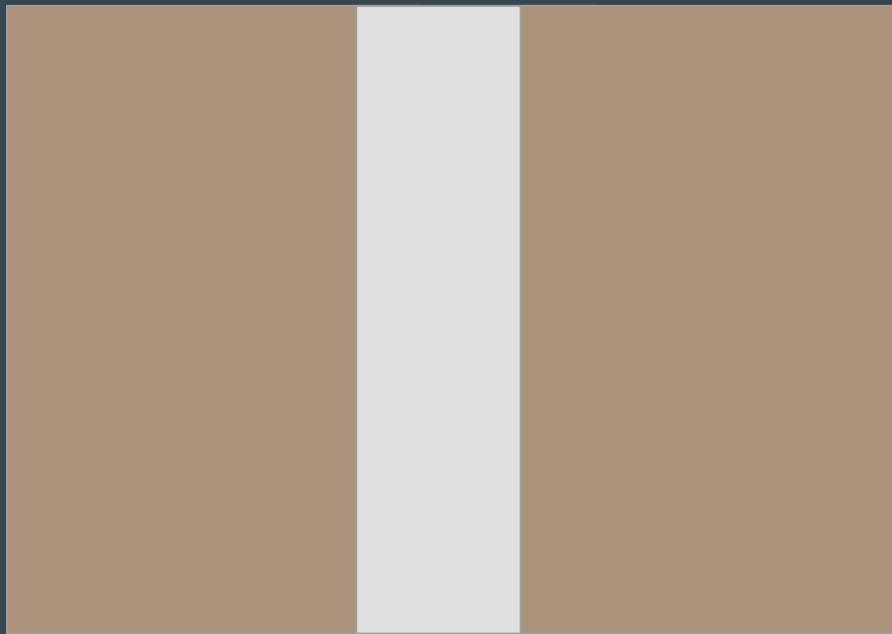

Cardstock

Part 2: Making the Case

Inside

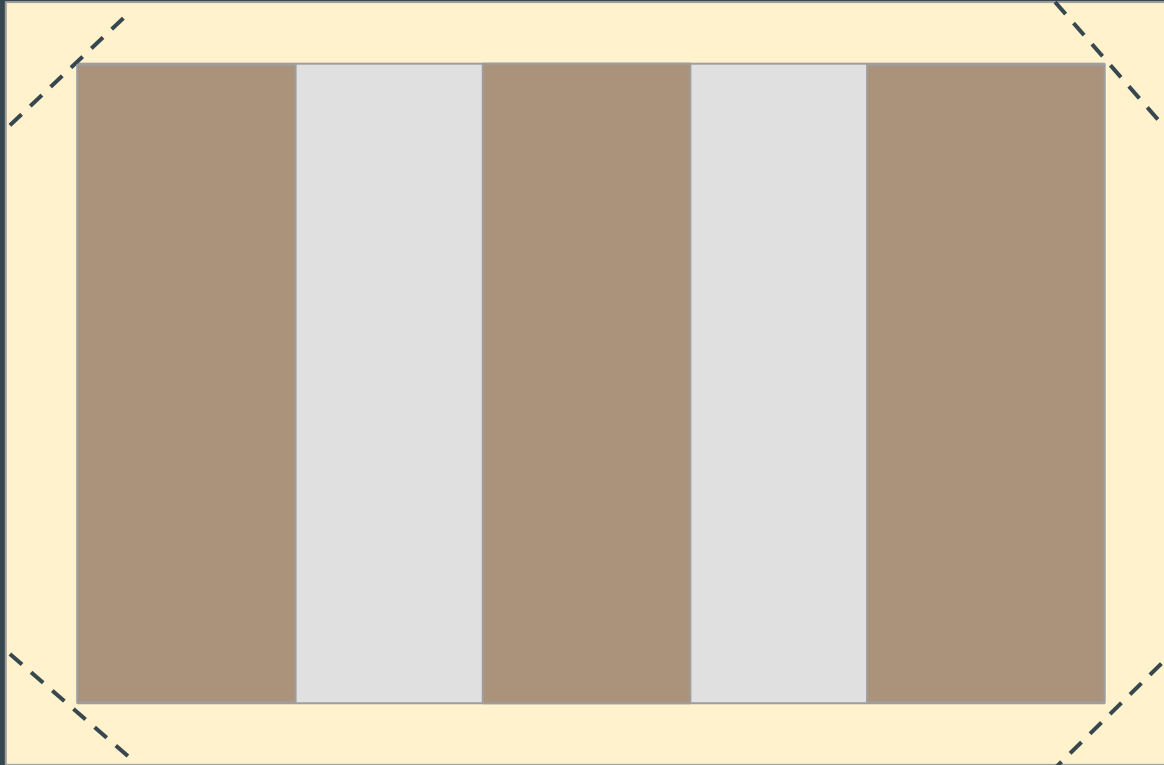

Outside

Part 2: Measure book to fit in casing

1. Put book in casing
2. Make sure there is 3-4 mm of clearance across all around the book
3. If not... measure, mark, and then cut

Glue Book Cloth to Case Cover

Inside

1. Cut at a 45 degree angle
2. Fold over and use bone folder to smooth out
